This is my first slide

- It has, of course, items in it
- More than one item
 - 1. Numbered lists, too

This is my second slide

rst2pdf can display code nicely:

```
for x in range(7):
print "cute!"
```

This is my third slide

Also, you can use math!

 $\frac{2 \pm \sqrt{7}}{3}$

That is *not* an image.

This is my 4th slide

Other features include:

- Images, including SVG
 - Tables
 - Font embedding (Type1 and TTF)
 - Extensible
 - Background (like this one)
 - Page transitions
